

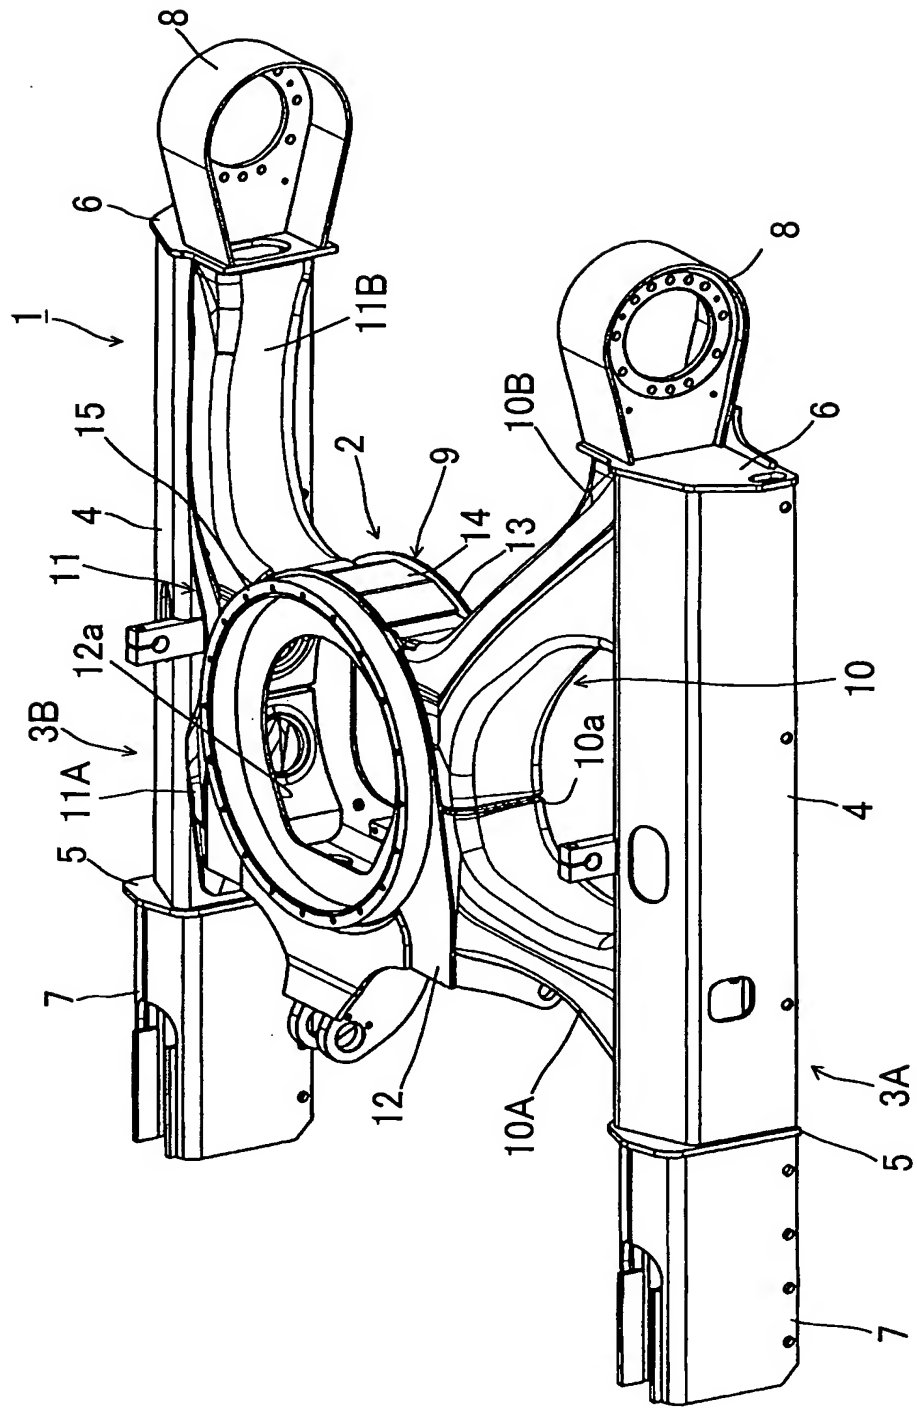

FIG. 1

This figure shows a perspective view of a vehicle seat assembly. It features a central seat cushion (9) and a backrest (2) connected by side rails (10A, 10B). The assembly includes various structural components such as frame members (1, 6), cross-members (4, 5), and adjustment mechanisms (11A, 11B, 12, 13A, 14, 15). The diagram illustrates the complex mechanical linkage between the seat and its supporting structure.
